

Botox Post-Treatment Instructions

You may experience some of the following:

- Occasional mild, temporary redness at the injection site
- Occasional mild, temporary swelling
- Rare mild bruising
- Occasional tingling sensations
- Very rare--droopy eyelid
- Very rare--nausea, fatigue, flu-like symptoms

Following BOTOX® therapy you may do the following:

- Immediately return to light activity, including work
- Apply makeup and skincare products as desired, but avoid glycolic or Retin A products for one day
- Please avoid rubbing the injection site and avoid strenuous activity for 24 hours
- Take Tylenol or Motrin as needed, especially if a headache occurs

Some areas of the face will respond more quickly than others to treatment. Final results may take up to 10 days. Please call with any concerns.
